ABOUT

I am a software developer that is proud to take part in the exchange of ideas. I believe that the dedication of the human spirit and the limitations of a person's own mind are the only barriers in software development. I thrive using ever-evolving suite of tools in order to make real software solutions to enrich the world around me.

EDUCATION

Codeup

600+ hours professional instruction in LAMP + Java
Graduated 2018

University of North Georgia

[here](#)

EXPERIENCE

Audio/Video Services Technician

University of North Georgia

2016-2017, Watkinsville, Georgia

Audio/video technician, programming Crestron units
over campus network while servicing faculty, staff, and
students with issues related to computers, projectors,
and general technical support

Remote Support Technician and Mentor Support.com

2013-2014, Remote from Home, Georgia

Worked from home for Comcast servicing networking
issues with Comcast leased gateways and a wide
array of devices, such as computers, game consoles,
smart TV's, and security systems. Served as an
instructor for oncoming service people.

Remote Support Technician SupportSpace

2012-2013, Remote from Home, Georgia

Worked as a contractor for Geek Squad from home as
a technical support representative. Areas of specialty
include Apple products (and teach technicians how to
service machines remotely via command-line),
networking, and virtualization solutions with VMWare
commercial products and Oracle's VirtualBox.
